SCREENS 40 inch screen 2 in total. Hanging from the ceiling. PROJECTORS A wooden board or panel that we can hang from the ceiling and where we can hang the screens in front of. Or a wooden board or panel where we can cut out the size of the screens and place the screens behind it. Last option is to have the wooden panel as a wall and hang the screens in front of it Black armchairs to sit on. (I will try both of the seats but always remove one from the space. -my responsibility The leather couch - my responsibility Picture frames with pictures (2 or 3) - my responsibility / Desk lamp - my responsibility / Small table next to the couch that carries the lamp and picture frames. - my responsibility Music stands. - my responsibility + + Lights in the installation. I want to light up the music stands. So maybe 1 is enough for the three music stands and than one at the entrance of the space where you see the fourth music stand. So I think to lights (spot lights) are enough. And colorwise I would prefer it to be a slightly warmer light but not to yollow.

Something else I might want to add: A fabric or curtain the close off a bit of the space and to create a clearer entrance. The color will be a light brown - my responsibility to arrange the fabric

SIZE OF THE SPACE = Preferably 3 m by 3 m but It can be reduced to 2,5 m by 2,5 m

If the hanging panel won't work. I would like to arrange 2 walls that will be placed against the original space wall. The added walls will be wooden and I will arrange these panels myself.
