

VHS Anatomy Workshop

Good old VHS! The day on which you stole our hearts at slumber parties and Halloween nights seems so long ago. The memory remains, although most tapes are now collecting fungi at the dump or in the attic. It's sad to see things go to waste like that, so let's get those old VHS tapes out of the closet and ready for the future! During the VHS anatomy workshop we will relive and surpass the past by making brand new movies with old pieces of tape. Participants learn innovative cut- and paste techniques and get to know all the ins and outs of the wonderful world of VHS. At the end of each workshop they can take their renewed VHS tape home to watch over and over again. A splendid way to spend the weekend!

The *VHS Anatomy Workshop* is an initiative of the artist and filmmaker, Niek Hilkmann. It is part of his media archeological project *Time and Time Again*, which is being shown at Tent during the graduation show of the Piet Zwart master in Media Design & Communication.
