

3 steps ETC Portal & Contamination tool:

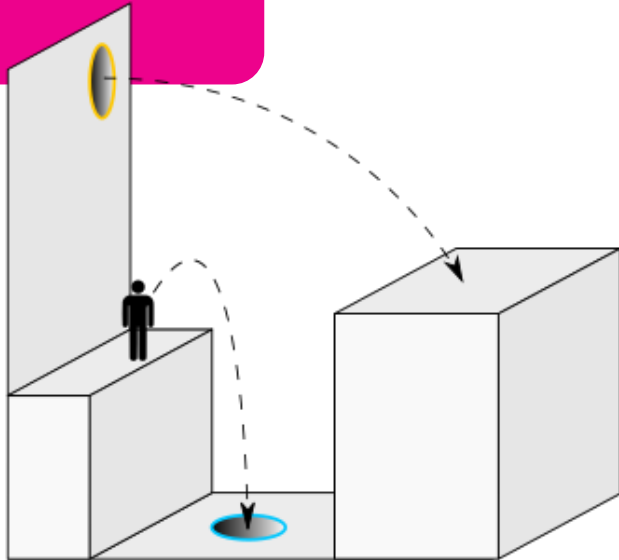

1. corpora --> list,
not print

**choose text
in vernacular
library**

convert .txt docs in strings
within function

**use etc
target filter**

.ipynb with Flask

2. html -->

**target
paragraphs
saved as a
list in order
to submit
separately**

form.html

paragraph 1.

submit

paragraph 2.

submit

paragraph 3.

submit

paragraph 4.

submit

**contamination, call new
function**

.ipynb with Flask

3. replaced content
--> wrap list in html

contaminated
content

contaminated
content

contaminated
content

contaminated
content

congratulations
token 🎉

print new
content
html
